Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

mN

	Application No.	Applicant(s)			
Office Action Comments	10/772,025	RISAN ET AL.			
Office Action Summary	Examiner	Art Unit			
·	Aravind K. Moorthy	2131			
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).					
Status					
1) Responsive to communication(s) filed on 11 Oc	ctober 2005.	·			
	action is non-final.				
· <u> </u>	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is				
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.					
Disposition of Claims					
4)⊠ Claim(s) <u>1-35</u> is/are pending in the application.					
4a) Of the above claim(s) is/are withdray	vn from consideration.				
5) Claim(s) is/are allowed.					
6)⊠ Claim(s) <u>1-35</u> is/are rejected.					
7) Claim(s) is/are objected to.					
8) Claim(s) are subject to restriction and/or election requirement.					
Application Papers					
9)☐ The specification is objected to by the Examiner.					
10)⊠ The drawing(s) filed on <u>03 February 2004</u> is/are: a)⊠ accepted or b)□ objected to by the Examiner.					
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).					
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).					
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.					
Priority under 35 U.S.C. § 119					
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).					
a) ☐ All b) ☐ Some * c) ☐ None of:					
1. Certified copies of the priority documents	s have been received.				
2. Certified copies of the priority documents have been received in Application No					
3. Copies of the certified copies of the priority documents have been received in this National Stage					
application from the International Bureau (PCT Rule 17.2(a)).					
* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s) 1) Notice of References Cited (PTO-892) 4) Interview Summary (PTO-413)					
2) Notice of Draftsperson's Patent Drawing Review (PTO-948) Paper No(s)/Mail Date					
3) Information Disclosure Statement(s) (PTO/SB/08)					
Paper No(s)/Mail Date see attachment. 6) Uher: S. Patent and Trademark Office					

DETAILED ACTION

- 1. This is in response to the communications filed on 11 October 2005.
- 2. Claims 1-35 are pending in the application.
- 3. Claims 1-35 have been rejected.

Information Disclosure Statement

4. The examiner has considered the information disclosure statement filed on 7/19/2005 and 10/11/2005.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1, 3, 9-15, 19, 20, 22, 24 and 30-35 provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-9 of copending Application No. 10/325243. Although the conflicting claims are not identical, they

are not patentably distinct from each other because the 10/325243 application is directed towards a method of preventing unauthorized recording of electronic media. The 10/325243 application teaches activating a compliance mechanism, controlling a data output path and directing media content to a custom media device.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

6. Claims 1, 9-15, 19, 20, 22 and 30-35 provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim1-3 and 5-9 of copending Application No. 10/364643. Although the conflicting claims are not identical, they are not patentably distinct from each other because the 10/364643 application is directed towards a method of preventing unauthorized recording of electronic media. The 10/364643 application teaches activating a compliance mechanism, controlling a data output path and directing media content to a custom media device.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 2, 4-10, 13, 15, 16, 18-20, 22, 23, 25-31 and 34 contain the trademark/trade name iTunes, iPod, Macintosh and Windows. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe a media service, a media player and operating systems and, accordingly, the identification/description is indefinite. For the sake of examining, the examiner will assume iTunes to be a media player, iPod to be a media playing device, and Macintosh and Windows to be any operating system.

Any claims not directly addressed are rejected on the virtue of their dependency.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. Claims 1-20 and 22-35 are rejected under 35 U.S.C. 102(e) as being anticipated by Doherty et al U.S. Patent No. 6,920,567 B1.

As to claim 1, Doherty et al discloses a method of preventing unauthorized recording of electronic media comprising:

activating a compliance mechanism in response to receiving media content at a client system from a content provider providing content in a format compatible with an iTunesTM media service, the compliance mechanism coupled to the client system, the client system having a media content presentation application capable of handling the media content operable thereon and coupled to the compliance mechanism [column 4, lines 15-34];

controlling a data output path carrying the media content of the client system with the compliance mechanism [column 4, lines 15-34]; and

directing the media content to a custom media device coupled to the compliance mechanism via the data output path, for selectively restricting output of the media content [column 4, lines 15-34].

As to claims 2 and 23, Doherty et al discloses that the custom media device comprises an iTunesTM [Figure 1D].

As to claims 3 and 24, Doherty et al discloses the method further comprising:

restricting the client system to have the custom media device implemented as a default media device [column 7, lines 4-8].

As to claims 4 and 25, Doherty et al discloses the method further comprising:

interfacing with the iTunesTM media service through the media content presentation application that comprises an iTunesTM application [column 10 line 24 to column 11 line 20].

As to claims 5 and 26, Doherty et al discloses that the client system operates a MacintoshTM operating system [column 10 line 24 to column 11 line 20].

As to claims 6 and 27, Doherty et al discloses that the client system comprises an iPodTM [Figure 1D].

As to claims 7, 18 and 28, Doherty et al discloses the method further comprising:

interfacing with the iTunesTM media service through the media content presentation application that comprises a Windows compatible iTunesTM application [column 10 line 24 to column 11 line 20].

As to claims 8 and 29, Doherty et al discloses that the client system operates a WindowsTM operating system [column 10 line 24 to column 11 line 20].

As to claims 9, 19 and 30, Doherty et al discloses the method further comprising:

preventing a recording application coupled to the client system from recording the media content when the recording the media content does not comply with at least one usage restriction applicable to the media content as applied by the iTunesTM media service [column 10, lines 10-23].

As to claims 10, 20 and 31, Doherty et al discloses the method further comprising:

allowing a recording application coupled to the client system for recording the media content when the recording the media content complies with usage restrictions applicable to the media content as applied by the iTunesTM media service [column 10, lines 10-23].

As to claims 11 and 32, Doherty et al discloses the method further comprising:
authorizing the client system to receive the media content [column 3, lines
17-19; column 5, lines 42-43; column 9, line 60].

As to claims 12 and 33, Doherty et al discloses the method further comprising:

accessing an indicator associated with the media content for indicating to the compliance mechanism that a usage restriction is applicable to the media content [column 8, lines 1-6].

As to claims 13 and 34, Doherty et al discloses the method further comprising:

altering the compliance mechanism in response to a change in a usage restriction applicable to the media content as applied by the iTunesTM media service, wherein the usage restriction comprises a copyright restriction or licensing agreement applicable to the media content [column 12, lines 35-47].

As to claims 14 and 35, Doherty et al discloses that the media content is received from a source coupled to the client system, the source from the group consisting of: a network, an electronic media device, a media storage device, a media storage device inserted in a media device player, a media player application, and a media recorder application [column 5, lines 34-36; column 7, lines 63-66; Figure 1D].

As to claim 15, Doherty et al discloses a method of preventing unauthorized recording of electronic media comprising:

activating a compliance mechanism in response to handling media content at a client system that is operating a Windows TM operating system, wherein the content complies with a format compatible with a Windows TM compatible iTunes TM media service, the compliance mechanism coupled to the client system [column 4, lines 15-34];

controlling a data output path carrying the media content of the client system with the compliance mechanism [column 4, lines 15-34]; and

directing the media content to a custom media device coupled to the compliance mechanism via the data output path, for selectively restricting output of the media content [column 4, lines 15-34].

As to claim 16, Doherty et al discloses the method further comprising:

receiving the media content from a content provider providing content in a format compatible with the iTunesTM media service [column 10 line 24 to column 11 line 20].

Application/Control Number: 10/772,025

Art Unit: 2131

As to claim 17, Doherty et al discloses the method further comprising:

receiving the compliance mechanism in a package that contains the media content [column 10 line 24 to column 11 line 20]; and

Page 9

installing the compliance mechanism on the client system [column 10 line 24 to column 11 line 20].

As to claim 22, Doherty et al discloses a computer system comprising:

a processor [column 10, lines 24-65]; and

a computer readable memory coupled to the processor and containing program instructions that, when executed, implement a method of preventing unauthorized recording of electronic media [column 10, lines 24-65] comprising:

activating a compliance mechanism in response to receiving media content at a client system from a content provider providing content in a format compatible with an iTunesTM media service, the compliance mechanism coupled to the client system, the client system having a media content presentation application capable of handling the media content operable thereon and coupled to the compliance mechanism [column 4, lines 15-34];

controlling a data output path carrying the media content of the computer system with the compliance mechanism [column 4, lines 15-34]; and

directing the media content to a custom media device coupled to the compliance mechanism via the data output path, for selectively restricting output of the media content [column 4, lines 15-34].

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

9. Claim 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over Doherty et al U.S. Patent No. 6,920,567 B1 as applied to claim 15 above, and further in view of Rhoads et al U.S. Patent No. 6,442,285 B2.

As to claim 21, Doherty et al does not teach accessing a watermark associated with the media content for indicating to the compliance mechanism that a usage restriction is applicable to the media content.

Rhoads et al teaches accessing a watermark associated with the media content for indicating to the compliance mechanism that a usage restriction is applicable to the media content [column 10, lines 22-30].

Therefore, it would have been obvious to a person having ordinary skill in the art at the time the invention was made to have modified Doherty et al so that the media content would have been marked with a watermark to indicate to the compliance mechanism that a usage restriction is applicable to the media content.

Application/Control Number: 10/772,025 Page 11

Art Unit: 2131

It would have been obvious to a person having ordinary skill in the art at the time the

invention was made to have modified Doherty et al by the teaching of Rhoads et al because the

watermark can control different levels of use of the media (i.e. no playback, single playback, two

playbacks etc.) [column 6, lines 19-54].

Conclusion

10. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Aravind K. Moorthy whose telephone number is 571-272-3793.

The examiner can normally be reached on Monday-Friday, 8:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Ayaz R. Sheikh can be reached on 571-272-3795. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
